- The Renewable Fuel Standard Provision of the Energy Independence and Security Act of 2007 require that 36 billion gallons of renewable fuels be used in the nation's motor fuel by 2022.
- The ethanol industry generated an estimated \$11.9 billion in federal tax revenue and \$9 billion in tax revenue for state and local governments. The estimated cost for the federal incentives in 2008 totaled \$4.7 billion. Therefore, leaving a surplus of \$7.1 billion for the federal treasury.
- Ethanol production generates 494,000 jobs, adds more than \$65.6 billion in gross domestic product, and puts an additional \$19.9 billion in the pockets of American consumers.
- The 9 billion gallons of ethanol produced and used last year displaced the need for 321.4 million barrels of imported oil, reducing the amount of money America sends to oil producing countries by \$32 billion.
- There are now 172 bio-refineries in 25 states with an annual production capacity of 10.6 billion gallons. The U.S. ethanol industry added 2.9 billion gallons of new production capacity during 2008.
