

112. PRIVATE LANDS COOPERATIVE INITIATIVE

We support development of state laws and policies promoting voluntary and incentive-based private land initiatives to:

1. Encourage economic stability in communities through long-term private land ownership.
2. Enhance on-farm income through recreation-based resource development.
3. Increase community revenue through expanded economic activity.
4. Improve public recreational opportunities on private land.
5. Provide liability protection to landowners.
6. Increase economic activity in depressed rural communities.
7. Promote cooperation between government bodies and private landowners.
